

Patient Name \_\_\_\_\_

Appointment Date \_\_\_\_\_ Time \_\_\_\_\_ AM/PM

**PREP FOR ALL PET/CT SCAN PATIENTS** (if Diabetic, see below also)

- No food 6 hours prior to study.
- May have water only, right up to time of exam, but no other liquids allowed.
- Wear warm, loose-fitting clothing with as little metal as possible (sweat suits are ideal).
- Rings and watches are okay but please remove other jewelry and piercings.
- No exercise or repetitive/vigorous activity 24 hours prior to exam. This includes yard work, sports, hunting, etc.
- May take regularly scheduled medications if able to tolerate on an empty stomach.
- For best results, completely avoid sugar, chewing gum (even sugarless) and caffeine the day of the exam and limit sweets and starches for 24 hours (NO sugar, potatoes, bread, rice or pasta).
- Must be able to lie flat on back for at least 20 minutes. \*

*\*a melanoma patient may be required to lie on his/her back for 30 minutes*

**DIABETIC PATIENTS** (see page 2 of form for acceptable foods and drinks)

• **Non-insulin dependent**

- Day prior to exam follow low-carb, high protein diet (see reverse side for sample diet).
- No strenuous activity for 24 hours prior to exam.
- The day of exam: no food, caffeine or chewing gum (even sugarless) 4-6 hours prior to exam.
- Water only 4-5 hours prior to exam.
- Take medications as usual morning of exam.

• **Insulin dependent**

- Goal is blood sugar level less than 200 at time of exam.
- Day prior avoid sweets and starches (see reverse side of form for sample diet).
- Day prior avoid strenuous activity.
- MUST have light, low-carb meal 4-6 hours prior to exam.
- May have water only right up to exam.
- No food, caffeine or gum (including sugarless ) until after exam.
- If using an insulin pump, PET/CT technologist will consult with you for best protocol.

**OTHER FACTORS AFFECTING PET/CT SCANS**

- No oral barium contrast studies within 48 hours of PET/CT (i.e. CT with oral contrast, UGI, video swallow).
